

The benefits of FeaturePlus

Reduce costs	FREE calls between your offices, home workers, or even your international locations. Wherever you are in the world, calls between your users are always FREE.
Business continuity	Unlike traditional pbx telephony and relocations, FeaturePlus allows you to keep your existing published numbers no matter where your business moves to. Because the service is hosted, your business communications will keep going in the event of a flood, power cut or office relocation.
Manage your business	Manage users and their privileges centrally; have a complete view across the business of all calls made, received and missed. Ideal for companies nervous about remote-working or who simply want to get the most out of their employees.
Large Enterprise Features	Computer-based functions and IP telephony services. Click your mouse on the phone number on the screen and make a call. No more manual dialling. See on screen how many calls each site has made or taken. Use an on-line phone directory so everyone can communicate with more ease.
Increase your business reach	Use virtual numbers to have a phone presence in any area of the UK. Having a local number means more 'local' business.
Low cost of ownership	Without the need to purchase a telephone system, alongside cost savings gained through rationalizing phone lines and reducing inter-site call costs, FeaturePlus is an affordable hosted VoIP solution that doesn't compromise on functionality.

Who is it aimed at?

Many UK and internationally-based businesses use FeaturePlus. These are some of the typical types of users:

Retail stores	Help reduce the number of phone lines per shop and reduce the cost of calls between stores. Lots of convenience stores, garden centres, wine shops etc. are using FeaturePlus.
Small office chains	Like estate agents and recruitment companies where inter-office calls are high, and measuring telephone productivity is very important.
Home workers	Works well in the home environment and allows calls to be transferred seamlessly, whether your home is close to the business or in another country.
Small international office	Linked in to the UK businesses with UK phone numbers. Inter-company calls are FREE.
